LOXONE

Loxone for smart homes

Loxone enables an ecosystem whereby all components in a smart home intelligently work together. Lighting, heating, security, blinds, multiroom audio all working in perfect harmony. This creates an unparalleled living environment.

We believe there are many reasons why you should turn your home into a smart home.

Here, we've put together just five of these reasons:

A Loxone smart home intuitively works in the background and gets things done - freeing up your time.

A comprehensive solution that can intelligently automate as little or as much as you'd like.
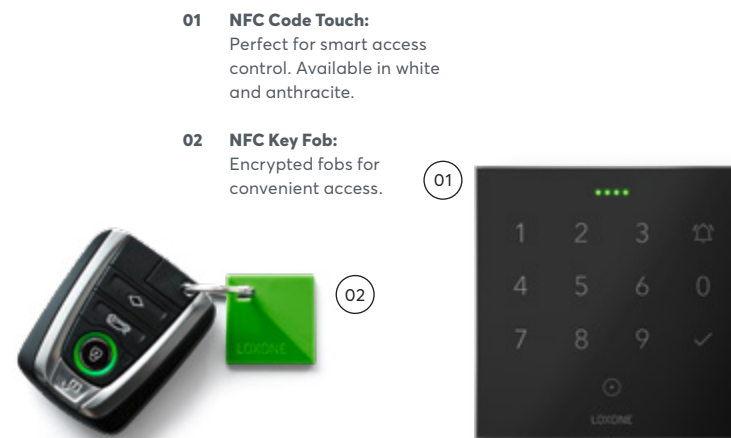

More security. Protecting you from burglars, protecting your home and family, and protecting your privacy.

Create a more energy-efficent home with intelligent energy management that monitors and reduces usage.

Intuitive control with our switch standard. Operate your lighting, blinds and music all from one point of control.

01 NFC Code Touch:
Perfect for smart access control. Available in white and anthracite.

02 NFC Key Fob:
Encrypted fobs for convenient access.

Loxone in commercial & custom applications

Loxone offers a large portfolio of high-quality products, user-friendly applications and intuitive programming software creating an unparalleled ecosystem with a range of open interfaces. This makes Loxone a fully-scalable solution perfect for MDUs, hotels, offices, as well as other commercial and custom applications.

Five reasons for Loxone in commercial projects and custom applications:

Completely scalable - for projects of all sizes.

Open interfaces: from DALI to Modbus, there's a wide range of open, freely-configurable interfaces.

Our powerful software complements your installation with the experience of over 120,000 buildings automated with Loxone.

Free app with tailored layouts to suit a variety of functions and different user permissions.

Cost-effective, multifaceted products, comprehensive ease-of-install, highly reliable, and no license fees.
